DEAR FRIENDS

Spring is here again and as usual our hopes are built up for a glorious flower season. We will carry a full line of chrysanthemums, annuals and perennials for sale here at our garden. Mail orders on chrysanthemums the last few seasons have arrived at their destination in such poor condition that we have discontinued shipping them, but local trade can still find a choice selection at our garden. Wishing all of you a very successful growing season,

We remain sincerely,

Ophelia and Harry.

**-FREE-**

With each order we receive, we will include, one FREE daylily with color preference if at all possible. New Customers should take advantage of our NEW CUSTOMER coupon. In appreciation for past patronage, all old customers will be allowed a 10% discount.

**PLEASE READ OUR TERMS OF SALE  
CAREFULLY BEFORE ORDERING.**

**ALL REPLACEMENTS WILL BE MADE  
AT OUR DISCRETION AND CUSTOMER  
MUST PAY TRANSPORTATION CHARGES  
ON ALL REPLACEMENTS.**

## DAYLILIES (Hemerocallis)

The Daylily is the most versatile of perennials, and can be used in all parts of your garden, for bloom all through the growing season. They can furnish shades of yellow, orange and brown with your Iris in late spring. They can be planted all through the perennial border to furnish shades of cream and gold, the sunshine colors, during the entire season. They can make bold splashes of orange, flame and shades of red against evergreens or shrubbery where you wish to make an accent point. Or you may have a garden of Daylilies by themselves, in all their lovely shades.

**CULTURE:** The Daylilies will grow in any good garden soil and are very drought resistant. However, they do appreciate plenty of moisture and nourishment. They will grow and bloom in partial shade, but should have sun for half a day, as too deep shade will cause weak stems and fewer blooms. They should be left undisturbed over a period of years, as they do not give their best performance until the second or third year. So they should be spaced from two to three feet apart to permit increase in size of clumps. Spread the roots out well when planting, and firm the soil down well. Well-rotted manure or compost with bone meal will be appreciated if incorporated in the soil while planting, and peat moss is also found to be beneficial.

Our prices are for blooming size plants. Daylilies will be shipped in the spring, or in late summer and fall.

## HOSTAS OR PLANTAIN LILIES

### Shipment Early Spring or Early Fall

The Hostas are excellent for edging borders, mass planting or in front of shrubbery. If you have a shady spot under trees that seems devoid of interest, then by all means try some of these interesting plants for they are at their best grown in such a location where their large sturdy leaves seem almost tropical in growth and very decorative. The racemes of bell like flowers of lilac, blue lavender and white rise well above the foliage.

### CULTURE

Plant in shade or semi-shade. Lightly dress in early spring with a good commercial fertilizer. Avoid animal manures. Water in dry weather.

**ALBA MARGINATA**—A picturesque plant with handsome big leaves edged with a broad band of white that holds its color throughout the summer. It grows into a fine ornamental clump. Ideal for flower arrangements, leaves more slender and not as broad as Fortunei Alba Marginata. Blooms in middle of summer on tall stalks. -----\$1.50

Hosta Fortunei Alba Marginata

**CAERULEA**—The true variety has the bluest flowers of any of the Hostas. It is the next largest in size of flower to *H. Plantaginea* with very round puffed out bells of lavender blue distinctly penciled on the inner surface with deeper color. The leaves are glossy green of large size and graceful form. -----\$0.75

**ERROMENA**—Robust growing plant with dark green leaves with prominent curved veins either side of midrib, blade of leaf about 8 to 10 inches long, about 4 inches broad. Flowers, pale lilac bells on stalks 2½ feet tall, blooms in July. -----\$0.75

**FORTUNEI**—A very fine outstanding species with good size glaucous leaves. Makes a fine specimen plant. Foliage not quite as large and more pointed than *Seiboldiana*. Lavender blue bell shaped flowers on stems 2 ft or more in July. -----\$0.75

**FORTUNEI GIGANTEA** — Also called tall cluster plantain lily. Leaves are blue-green of large size and are crinkled. Flowers pale lilac, well separated on tall stalks that rise well above the foliage. Blooms early in July. -----\$1.50

**HOSTA HONEY BELLS**

**HOSTA HONEY BELLS** — Delectable light green leaves, scented arbutus, lovely and very highly scented trumpet-shaped flowers of lavender-lilac, pencilled blue, through July and August. -----\$1.00

**LANCIFOLIA ALBO-MARGINATA** — The narrow-leaved plantain-lily, is a rapid grower. The slim light green leaves have a white line along the edges of the narrow blades. The leaves are about eight inches to twelve inches long. The flowers are lavender, with white lines, bell-shaped, on two-foot stalks in the middle of August. This makes a bushy growth of leaves and a thick border plant. It is a very pleasing plantain-lily and desirable to have as it blooms vigorously and freely. \$0.75

**LANCIFOLIA AUREA**—Narrow golden leaves in early spring returning to darker green as season advances. Flowers are lavender bells, blooming in July and August. -----\$1.00

**LANCIFOLIA FORTIS** — Lance leaf plantain lily. Long lance like foliage, dark green in color, produced in abundance. Flowers are violet. Bloom september and October on stems two feet tall (very floriferous and especially welcome as it is in bloom over a long period in the fall when flowers are scarce). -----\$0.50

**SIEBOLDIANA** — The large, broad rounded leaves are overlaid with a heavy gray blue luster. The creamy pale lavender flowers have heavy substance and are borne on short clustered stalks above the foliage. In bloom about the first of July. -----\$3.00

### SUBCORDATA GRANDIFLORA

—Large, yellowish-green leaves on long stems, largest blooms of all Hostas. Pure white, lily-like blooms of rare fragrance. In bloom August through Sept. Hgt. 24 inches. -----\$1.00

**UNDULATA UNIVITTATA**—The heavy waxy, dark green leaves are very decorative with wide creamy, white stripe in the center of the leaves, the long bell-shaped flowers, lavender shade. Bloom in July on stems 30 in. tall. ----\$0.75

**UNDULATA VARIEGATA**—This plant has more white in foliage and leaves are quite wavy. Lovely lavender blossoms in July. -----\$0.75

## TALL BEARDED IRIS

### CULTURE

Tall Bearded Iris will give excellent results in any fertile soil with reasonable drainage and exposure to sunlight. Whether the soil is neutral, slightly acid or calcareous makes little or no difference. Plants should be set out so that the rootstock (rhizome) is barely underground. If soil is dry when planting is done a thorough soaking is beneficial, but after the plants become established they require very little moisture after blooming. When the plants become too crowded or decrease in their flowering, division is likely necessary. Bearded iris will grow but not bloom properly in a shaded location.

**MY LOVE** (Scheffy)—46 in. A very new one by this hybridizer. A large, stately soft, medium blue of fine form and finish. A strong, well branched plant with long blooming period and much in demand for breeding due to the fact that this siberian is a twice bloomer. A must for those who want the latest and best. -----\$1.50

**ROYAL HERALD** (Scheffy) NEW—Earliest of the large, tall, dark group. The richest plum-purple self with large drooping black falls like black velvet. -----\$1.50

**SNOWCREST** — 36 in. Snowy white blooms of excellent texture on tall stems. Perfectly formed blooms slightly ruffled. Unexcelled for cutting. -----\$0.75

**SNOWY EGRET**—36 in. A large pure white that is generally regarded as one of the finest white siberians. ----\$1.50

**SNOW QUEEN**—28 in. A low white with an attractive yellow signal patch. -----\$0.75

**TOWANDA RED FLARE** (Scheffy)—33 in. A large reddish self, with wide segments and falls flaring widely. Styles slightly lighter. Haft, bright red-brown and gold over white. Between ASTOR and the darker ERIC in tone. Vigorous compact growth; flowers freely a little above the rather tall foliage. A very bright garden subject. -----\$1.50

**TUNKHANNOCK** (Scheffy)—36 in. The largest and most beautiful white siberian we have listed to date. Simply superb, with large, broad falls. Grand texture. -----\$2.00

**TURQUOISE CUP** — 42 in. Exquisite, clear turquoise blue flowers of finest poise and finish. A favorite with many. -----\$0.75

**TYCOON**—A huge, violet-blue, broad petalled with an ideal satiny finish. Can not be excelled for cut flower arrangements. Said to be the largest siberian grown to date. -----\$1.50

**WHITE DOVE**—50 in. Tallest, most vigorous white, with an attractive golden throat. Fall flaring. -----\$0.75

**ZERITA** (Scheffy) NEW — Like Zest, much, very much larger flowers. The center glow of the rose-red styles makes the clumps very outstanding. -----\$1.50

**ZEST**—34 in. A very lovely medium blue with outstanding reddish styles. -----\$0.75

# SPURIA IRIS

Don't be content with Bearded Iris alone!

The *Spurias*, sometimes called "Butterfly Iris", resemble the Dutch irises which are extensively used by florists, but the flowers are large, and numerous blossoms are borne on the three to four foot stalks, making a very showy display in the garden, and are superb as cut flowers, as they are not as fragile as the bearded iris and keep for days. The color range is wide, ranging from near white and creamy-yellow to a deep golden yellow, and from lovely old-gold shades down to a deep golden brown. There are lavender-blues and true blues and a mixed planting is indeed a very beautiful sight. The browns are quite new and unusually interesting.

*Spurias* require very little care, and can be left in a permanent location, so should be given room in which to grow. They thrive in full sun or partial shade, and do best if kept well watered in the early spring and throughout the blooming season.

Keep very moist until established. Perfectly hardy, they are very worthwhile additions to any garden. *Spurias* bloom at the same time as the late flowering bearded iris.

*Spurias* will be shipped only in the fall at the proper planting time. In planting them be sure to cover rhizomes three to four inches.

**AZURE DAWN** (Nies)—A blue-lavender *Spuria* of uniform coloring, except for a pale yellow patch on the falls. The smoothness of the coloring is particularly pleasing. 4½ ft. -----\$0.75

**BLUE MONSPUR**—36". Cobalt blue. The prettiest *spuria* in our gardens. \$1.00

**BRONZSPUR** (Nies)—A combination of sepia, old gold, and yellow, giving us a flower unusual and especially beautiful as a cut flower. 6 ft. -----\$0.75

**CHEROKEE CHIEF** (Nies)—A velvety, deep brown iris with rich yellow signal patch on the flaring falls, which intensifies the rich brown color. Large flowers on tall stems. -----\$3.00

**DR. ANNIE BESANT**—A very large and tall variety. Flowers are cream with a lovely gold splotch on falls. Used extensively in florist's arrangements. 60 in. -----\$1.50

**GOLD NUGGET** (Milliken) — A free flowering bright yellow which has become very popular. The flower stalks have three to four clusters of buds and flowers, each cluster containing two or three flowers. 4 ft. -----\$0.75

**HAZY HILLS**—A lovely, full, light blue *spuria* of distinction. -----\$0.75

**MONNIERE**—A soft yellow. The flowers have rather broad petals and are of smooth texture. Fine for cutting. 3 ft. -----\$0.75

**MICHIGAN STATE** (Nies) — A huge, bronze flower of a beautiful round form. A loose veining over both standards and falls produce the light bronze effect. 40 inches. -----\$0.75

**MT. BALDY**—42". A huge white *spuria* with lovely impressive yellow signal patch. -----\$1.50

**MT. WILSON** (Milliken)—A blue *Spuria* which makes an excellent variety to plant with some of the yellows, such as Monniere or Gold Nugget. 3 ft.-----\$0.75

**PASTORAL** (Nies)—A corsage flower. The flaring falls are orange yellow, edged with pale lavender while the erect standards are yellow changing to lavender. The light lavender styles with their deep lavender crests add a finishing touch. 32 inches. -----\$1.00

**RUSSET FLAME** (Nies) H.M., 1950—A vigorous, free flowering *Spuria* of rich russet coloring which makes it especially useful as a cut flower. The undercolor is deep yellow, the falls as being heavily bordered with dark brown while the standards are washed to a brownish yellow. 3½ ft. -----\$1.00

**SUNNY DAY** (Sass) — An excellent bright yellow which is very popular. 3 ft. -----\$0.75

**WADI ZEM ZEM** (Milliken)—A beautiful large cream colored Spuria. The rounded spreading falls are two inches or more in width. The standards are erect and open. 4 ft. -----\$2.50

**WHITE HERON** (Milliken)—Whiter in appearance than any spuria todate. Some yellow on inner portion of flower. A pure white spuria is a goal not yet acieved. A very large flower on 4 ft. stems. -----\$3.00

**ZEPHROSA**—40". A lovely light honey colored flower with rosy overlay. Very large, heavily ruffled with excellent texture. -----\$3.50

**WADI ZEM ZEM**
